## PROJECTS

### **LearnEasy**

Jan 2024 - Present

It's a project for the First year pursuing Engineering students which includes the entire curriculum for them required to clear the year from Notes, Past year Questions, Important Questions, HOTS, exclusive lectures and guidance materials as well. It is a business model with a premium version as well and also a boon to students who cannot afford a college, they can learn everything and anything with the help of LearnEasy which can later be scaled to a complete course level and make teaching and skill-learning easier rather than sticking to traditional teaching methods, Anyone and Everyone can learn for Free or with very minimal fees which is affordable by everyone.

### **MyCaloriePal**

Mar 2024 - Present

It's a Calorie Calculator and recipe app all in one which makes use of APIninjas' API as well as EDAMAM's API to calculate Calorie of any food stored in the database as well as any recipe over the internet, the API makes use of the prompt to find the respective recipe of the food all over the google. It also has a feature of BMI calculator. It

returns Nutrients in a food as well as has an astonishing UI/UX for the user and is somewhat responsive as well!
